# ENVIRONMENTAL POLICY

UPDATED NOVEMBER 2023

Advanced Facility Care practices sustainability in our business daily as we care about our Environment, and we believe the importance of doing our part in reducing the carbon footprint and making a difference in the way work. We have identified areas where we could contribute to a more sustainable and researching an eco-friendlier approach.

Our objectives are not only to meet the existing environmental laws and regulations, our environmental-based approach and methodology across the business aims to regularly audit ourselves and proactively review our processes and procedures to ensure that take an ethical approach, always.

Our Policy objectives are:

- ✓ Using eco-friendly chemicals and alternative cleaning solutions which are harmless to the environment and people but eliminates harmful bacteria and virus.
- ✓ Saving water where possible by using innovative and water efficient cleaning equipment that could reduce water wastage.
- ✓ Moving towards Hybrid and EV vehicles to replace petrol vehicles.
- ✓ Going paperless. Minimising paper waste by eliminating unnecessary print jobs by having an electronic document library and sending invoices electronically.
- ✓ Minimising wastage and maximise recycling, by collecting a record of waste per site and working alongside clients on a regime to limiting waste and promoting the reduce, reuse, and recycle initiative.

We believe by consistently practicing our environmental policy and reviewing this on a regular basis, together we can make a difference in keeping our Aotearoa clean, green, and beautiful.
